Scenario-Based Stress Tests of Institutional Containment
S0 Maximal-Connectivity Topology
S1 Sparse Sequential Topology
S2 Hub-Mediated Topology
S3 Layered Topology
(A) Systemic contagion across propagation pressure
Mean systemic contagion (%)
Propagation probability p
(B) Cross-cell leakage across propagation pressure
Mean cross-cell leakage (%)
Propagation probability p
(C) Compromised execution persistence across mediation delay
Mean compromised execution persistence
Mediation delay τ (simulation steps)
(D) Systemic contagion across non-detection
Mean systemic contagion (%)
Episode-level non-detection probability FN
